- Programming languages: PHP, JavaScript, HTML5, CSS3
- Framework and APIs: React JS, Angular, Node JS, Express JS, SASS, Bootstrap, jQuery, AJAX, REST API, Custom APIs (PayPal, Google, Social medias)
- Database: My SQL, SQLite, Oracle, MongoDB, JSON, XML
- Concepts: Data Structures, Algorithms, UML, draw.io

## NON-TECHNICAL SKILLS

- Can work efficiently and calmly in stressful condition
- Multitasking and problem-solving ability
- Always try to get innovative ideas from various places

## WORK EXPERIENCE

<b>AR-TECHSPOT</b> (Vadodara, Gujarat, India) <b>Junior Web Developer</b>	May 2016 – Sep 2018
<ul style="list-style-type: none"><li>• <b>Technologies:</b> Java, MySQL, PHP, JavaScript, HTML5, CSS3</li><li>• Built and design client’s website, please look upon portfolio</li><li>• Manage API integration, web hosting, app debugging, managing database</li><li>• Worked with the requirement gathering team</li><li>• Did frequent research based on client/user feedbacks on various websites/app</li><li>• Work with PHP (OOPs) and MySQL to create back-end which allow users to dynamically update their application</li></ul>	

## ACADEMIC PROJECTS

### Recipe Website

- Angular, Typescript, Html CSS
- User can create new recipes with more ingredients. One can fetch data and save to backend firebase
  - Added components, routing module and dependency injection due to complex web-page
  - Connected all components with services. Included an Auth Guard to secure backend from customer with firebase.
  - Link - [recipe-book](#)

### Movie-Website

- Angular, Typescript, Html & CSS
- Fetch all sorted movies from MOVIEDB API and store inside array
  - Populate movies sorted by popularity, upcoming and in-show

### Health Seva

- Android, Java, Xml
- **Aim:** When specific symptoms are selected, a known disease will be generated based on that symptoms
  - Build by probability algorithm that gathers all the symptoms before corresponds to backend data – final result will be generated
  - Integrate, deploy and hosted with firebase database and validate through email/pass. authentication
  - Finalize project within 4-5 months with a group of 4 people
