OBJECTIVE

Hello I, myself looking for a Web Developer position. Past one year I have got studying Mobile App Dev course which I did projects based on IOS, Android and Web. Now I have got under Web part where I experience and practice in Angular and little React. Am hugely focused in Web and Android.

PROJECT

June' 2020

Recipe Website
Made with Angular

- This recipe website is included with backend Firebase database and authentication.
- Made by me. Added components, routing module and dependency injection.
- Connecting most of the components with services. Included an Auth Guard to secure backend from customer with firebase.
- Website/13

April' 2020

Movie-Website
Made with Angular

- Fetch and get Api Json data to web.
- It populates any kind of movies sorted by popularity, upcoming and soon.

April' 2018

Health Seva
Made with Android

- Purpose: Final year capstone project
- Aim: When specific symptoms are selected, a known disease will be generated based on that symptoms
- Integrate firebase storage in Android
- Created within 4-5 months in a team of 2

OTHER

Mar' 2019

Green Cross Society
Pm – not really
